

LONESTAR
MOBILE SECURITY

BRAND GUIDELINES · VERSION 1.0 · SEPTEMBER 2026

How Lonestar looks, sounds, and shows up.

Eyes on your site. 24/7.

What we do

Lonestar Mobile Security rents solar-powered mobile security camera towers to construction sites, equipment yards, dealerships, events, and vacant properties across Greater Houston. We deliver, deploy, and service every tower, and we offer 24/7 professional monitoring for one flat rate per site.

Positioning statement

For Houston site owners and managers with valuable assets sitting outdoors overnight, Lonestar is the local tower rental that shows up in days, needs no power or wiring, and watches the whole site in 4K for less than a tenth of a guard.

Personality

- **Straightforward.** We say what the tower does and what it costs.
- **Dependable.** Answers the phone, shows up when promised, fixes what breaks.
- **Texan, not a cartoon.** Confident and warm. No spurs, no y'all in every sentence.
- **Watchful.** The brand is calm and alert, like a good night watchman.

Tagline and supporting line

Eyes on your site. 24/7.

Solar-powered mobile security towers. Delivered, deployed, and monitored across Greater Houston.

Pricing language

Always **\$750/month per tower** and **\$150/month per site** for monitoring. Monitoring is one flat rate no matter how many towers are on the site.

LOGO

One mark, four lockups.

The shield stands for protection; the lone star is Texas and the light on top of the tower. The horizontal lockup is the default. Use the stacked version for square spaces, the mark alone for avatars and favicons, and the wordmark when the mark appears elsewhere on the page.

HORIZONTAL (PRIMARY)

STACKED

MARK · WORDMARK

Clear space

Keep clear space equal to the height of the shield on all sides. Nothing else lives inside that box.

Minimum size

Horizontal lockup: 1.25 in (120 px) wide. Stacked: 0.9 in (85 px) wide. Mark alone: 0.3 in (24 px). Below these, use the mark only.

Files

SVG (text converted to outlines; give these to sign, wrap, and print shops) and 3000 px transparent PNG for documents and web. All in **01 Brand Identity / Logos**.

Color variants and rules.

FULL COLOR ON LIGHT

FULL COLOR ON DARK (NAVY OR PHOTOS)

ONE COLOR NAVY - ALSO AVAILABLE IN WHITE

Do

- Place on navy, white, or a darkened photo
- Use the one-color white version over busy photos or on safety-yellow signage (navy)
- Scale proportionally from the SVG
- Pair with the tagline set in Barlow Condensed

Don't

- Stretch, rotate, outline, or add effects
- Recolor the star anything but gold, white, or navy
- Put the full-color logo on gold or red backgrounds
- Re-typeset the wordmark in another font
- Crop the shield or separate the star from it in the lockup

COLOR

Navy carries the weight. Gold points the way.

Navy is 60 to 70 percent of any layout. White or Paper is the field for body content. Gold is the accent: the star, the button, the number that matters. Never more than one gold element competing on a page.

Navy 900

HEX #071224
RGB 7 / 18 / 36
CMYK ≈ 81 / 50 / 0 / 86

Backgrounds, hero panels, footers

Navy 800

HEX #0B1C33
RGB 11 / 28 / 51
CMYK ≈ 78 / 45 / 0 / 80

Primary dark surfaces, headings on light

Navy 700

HEX #12294A
RGB 18 / 41 / 74
CMYK ≈ 76 / 45 / 0 / 71

Cards on dark, shield fill

Navy 600

HEX #1A3A6B
RGB 26 / 58 / 107
CMYK ≈ 76 / 46 / 0 / 58

Glow gradients, hover states

Gold

HEX #F2B134
RGB 242 / 177 / 52
CMYK ≈ 0 / 27 / 79 / 5

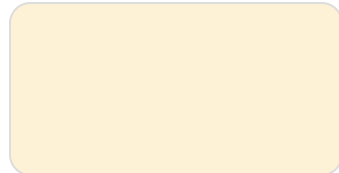

Accent: star, buttons, highlights, key numbers

Gold Dark

HEX #D9971C
RGB 217 / 151 / 28
CMYK ≈ 0 / 30 / 87 / 15

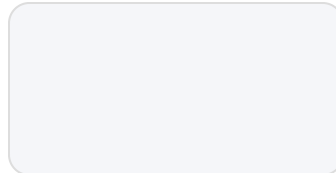

Icons and small text on light backgrounds

Cream

HEX #FDF1D6
RGB 253 / 241 / 214
CMYK ≈ 0 / 5 / 15 / 1

Tag backgrounds, callouts

Paper

HEX #F5F6F9
RGB 245 / 246 / 249
CMYK ≈ 2 / 1 / 0 / 2

Alternate light sections

Ink

HEX #101A2B
RGB 16 / 26 / 43
CMYK ≈ 63 / 40 / 0 / 83

Body text on light

Ink 2

HEX #3B4A63
RGB 59 / 74 / 99
CMYK ≈ 40 / 25 / 0 / 61

Secondary text

CMYK values are mathematical approximations for reference; ask your printer to convert from the RGB/HEX values or supply a Pantone match (Navy 800 ≈ PANTONE 2767 C, Gold ≈ PANTONE 1235 C are close starting points; verify with a printed proof).

Barlow Condensed talks loud. Barlow explains.

HEADLINES · BARLOW CONDENSED EXTRABOLD / BOLD

Eyes on your site.
24/7.

Section headings in Bold, sentence case.

EYEBROWS AND LABELS · UPPERCASE · TRACKED +20%

BODY · BARLOW REGULAR / MEDIUM / SEMIBOLD

Body copy is Barlow Regular, 10.5 to 12 pt in print, 17 px on the web, with generous line height (1.45 to 1.6). Use **SemiBold** for emphasis instead of italics. Keep sentences short; the brand sounds like someone who has stood on a jobsite.

Both families are free under the SIL Open Font License. Files are in **01 Brand Identity / Fonts**; they are also on Google Fonts, so Google Docs and Slides can use them directly.

USE	FONT	SIZE (PRINT)
Hero headline	Barlow Condensed ExtraBold	36 to 48 pt
Section heading	Barlow Condensed Bold	18 to 24 pt
Eyebrow / label	Barlow Condensed Bold, caps	9 to 10 pt
Body	Barlow Regular	10.5 to 12 pt
Fine print	Barlow Regular	8 to 9 pt

Plain-spoken. Confident. Specific.

Principles

- **Say the price.** \$750 and \$150 are strengths. Put them early.
- **Describe, don't hype.** "Two 4K cameras on a 12-foot mast" beats "state-of-the-art surveillance solution".
- **Short sentences.** One idea each. Read it out loud at a jobsite gate.
- **Name the fear once, then solve it.** Copper walks off. Here's what stops it.
- **Texan by attitude, not by vocabulary.** No forced dialect.

Say this, not that

Say

"No power on site? Perfect.
It runs on sunshine and LTE."

Not

"Our innovative off-grid
solution leverages
renewable energy."

Say

"A guard is \$9,000 a month
and stands in one place."

Not

"We offer a cost-effective
alternative to traditional
security."

Say

"Live the day it arrives."

Not

"Rapid deployment
capabilities."

Say

"Someone's watching. Even
at 3 a.m."

Not

"24/7/365 monitoring
services available."

Real sites, real towers, real light.

What to shoot

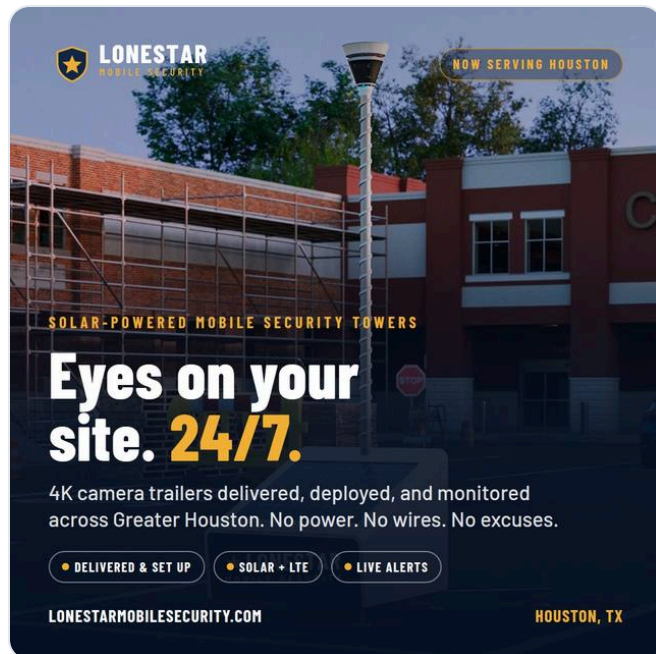

- The tower on a real Houston site, wide, with the site in frame
- Dusk and night: the floodlight on, the mast lit
- Deployment: mast going up, crew leveling the trailer
- Details: the camera head, the solar panel, the Lonestar panel
- People: your team in Lonestar shirts, never staged "criminals"

Treatment

- Natural color, slightly cool shadows; never HDR or heavy filters
- On graphics, darken photos with a navy gradient so white and gold type stays legible
- Blur faces and license plates in any footage you publish
- Get written permission before naming a customer's site
- The current product images are derived from manufacturer assets; replace them with your own deployment photos as soon as possible

APPLICATIONS

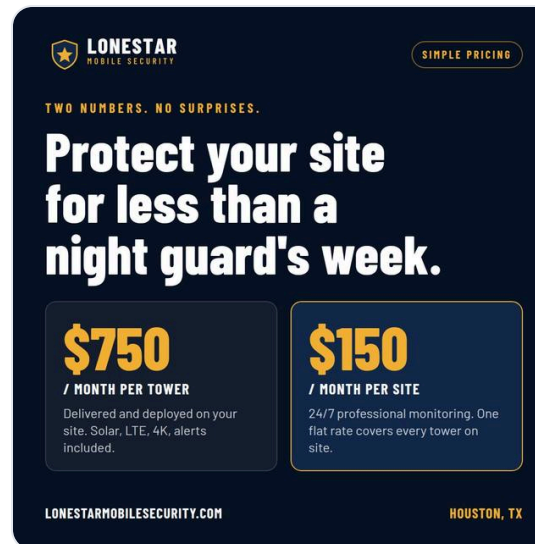

The system in use.

SOCIAL POST

Layout rules

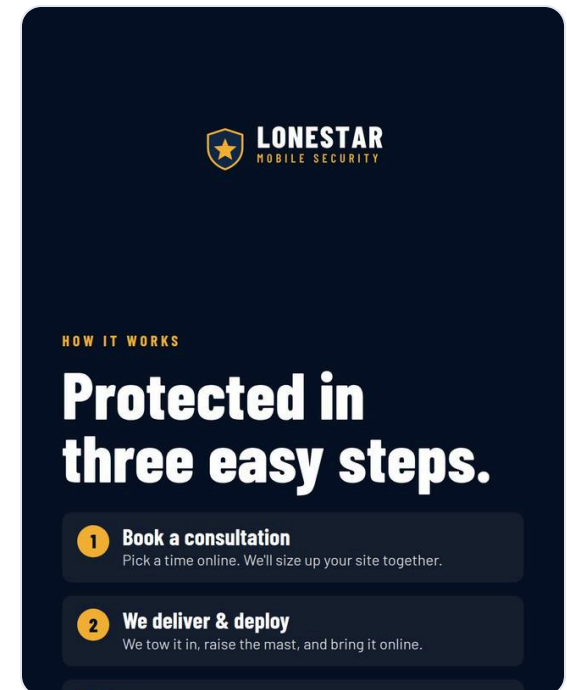

- Logo top-left, URL bottom-left, location or tag in gold at the right
- One headline in Barlow Condensed with one gold phrase
- Photos darkened with the navy gradient; text always bottom-left
- Round corners at 10 to 20 px on cards; pills for tags and chips

PRICING POST

Signage

- Navy sign for the trailer; safety-yellow sign at the site entrance
- "WARNING · This site is monitored 24 hours a day" is the standard wording
- Always include the URL; add the phone number when you have one

STORY

ASSETS

Where everything lives.

FOLDER	CONTENTS
01 Brand Identity	This guide, logos (SVG + PNG), fonts
02 Print Collateral	Sell sheet, pricing sheet, signs, postcard, business card, decal
03 Social Media	Posts, stories, covers, playbook and captions
04 Sales Tools	Pitch deck, playbook, outreach templates, proposal
05 Advertising & Local SEO	Ad copy bank, listings guide, press release
06 Marketing Plan	90-day plan, checklist and KPI tracker
07 Photos & Video	Product photos, share image, hero video

Questions

Brand questions go to the owner. When in doubt: navy field, one gold accent, Barlow Condensed headline, say the price.
